Hello there everyone, on behalf of the faculty and staff of Campuswide Honors. We are so glad to welcome you to UCI and especially to Campuswide Honors summer advising.

We are really happy to have you join the honors community. My name is Christina Treble and I'm one of your honors advisors. There are three other professional advisors.

Sorry.

And I'm going to show you the slide for that now.

Technical difficulties. Okay, so there are three other professional advisors that work full time in the honors office and our job is to answer all of your questions, make you feel comfortable and help you succeed and honors at UCI.

I'm joined by another Honors advisor Theresa Nguyen, who will be managing the webinar’s chat and she's listed under Campuswide Honors, so feel free to send your questions to her. And here's some webinar logistics. If you have any questions throughout the webinar, type them into the chat box and we'll respond as appropriate.
You'll also notice this presentation is split into three modules. We are in module one now. You need to remain in the meeting for all three modules to fulfill your Campuswide Honors summer advising requirement.

00:16:33.510 --> 00:16:35.760

Now on this next slide.

00:16:37.590 --> 00:16:48.570

You can see the Campuswide Honors staff members who you'll be meeting very soon, including the tall gentleman in the back. Our faculty director, professor Ted Wright.

00:16:49.740 --> 00:17:00.390

We are all here today for the mandatory Campuswide Honors summer advising session.

00:17:00.690 --> 00:17:00.390

Let me quickly share with you the exciting news that we are getting a promotion and moving up from being the

00:17:00.690 --> 00:17:13.560

Campuswide Honors Program to becoming the Campuswide Honors Collegium which is a fancy way of saying college. So you’ll hear people including us refer to honors as CHP, which is our old name.

00:17:14.160 --> 00:17:20.910

As well as simply Campuswide Honors (the new one). So, you are the Collegium’s first incoming class. Yay for you!

00:17:21.720 --> 00:17:26.790

So as we wait for everyone to enter the meeting, get their audio setup. We have a few announcements.

00:17:27.210 --> 00:17:39.570
If you have not satisfied UC Entry Level Writing and you have not already communicated with us about how you will fulfill that requirement this summer, please email honors@uci.edu with your plan.

00:17:41.280 --> 00:17:50.040

You should also have received a link to the Campuswide Honors freshman summer 2019 advising packet in the emails about this webinar.

00:17:50.460 --> 00:17:54.900

I also posted a link to it earlier on in the chat comments.

00:17:55.470 --> 00:18:04.200

We understand that you've been getting a lot of information from UCI, your school, your major and us and it can all feel really overwhelming at times.

00:18:04.560 --> 00:18:12.480

And that's why we like to talk to you as early in the summer as possible so that we can try to answer all of your Campuswide Honors-related questions.

00:18:12.870 --> 00:18:21.270

And this packet is going to be a great tool to guide you at your orientation and throughout the summer and we will refer to it during our presentation.

00:18:21.930 --> 00:18:31.530

We recommend you open the packet now to follow along. Take notes and bring the packet and notes with you to group advising and enrollment at orientation.

00:18:32.070 --> 00:18:35.430

And please make sure to read the entire packet on your own later.

00:18:35.970 --> 00:18:44.340
This is actually our advising model. So we count on you to review requirements and logistics like this packet, the honors website and so on.

On your own so that when we're actually together we can focus on what's important, your questions and concerns. So the bottom line is if we've given it to you, published it on our website, or emailed it to you, we are expecting you to read it.

Speaking of email, you need to check your UCI email at least once a day and thoroughly read emails you get from Campuswide Honors. Specifically look for emails from honors@uci.edu, honors.pa@uci.edu, and chp.frontdesk@uci.edu.

We know you get a lot of emails. So we will email you weekly about important deadlines and upcoming honors events that you can add to your calendar.

Above and beyond that we will only email you when it's really important. And you can and should respond to any emails we send you if we ask you to or if you have any questions or need to follow up.

This session is your introduction to Campuswide Honors. We're going to do our job as advisors and try to answer all of your honors related questions during this presentation,

Including: What is Campuswide Honors? Why did you get selected for this program? What do you need to do to participate in, and ultimately complete honors? And how do you enroll in honors classes?

So let's begin at the beginning with what are we all doing here? What is Campuswide Honors? Many of you probably have experience with honors from high school.
Of course, college is very different from high school, but here are some things Campuswide Honors at UCI may have in common with honors at your high school:

Specially designed honors classes, experienced teachers (also known as faculty or professors at UCI) as well as support staff who love honors,

There's also a community of learners who nurture the group (and here, that's you! So you are the glue that holds this whole thing together both in and out of class.) I hope this is relatable to many of you.

So applying the honors experience you already have to UCI, this is our mission statement - a more official way of saying what Campuswide Honors is and why we do what we do.

We create a learning community and provide you with opportunities to develop for yourself a personalized experience on this large campus.

You'll get to take classes with your peers who are other highly dedicated students with similar goals.

Receive extra assistance and individualized support from honors advisors and have special opportunities to build connections with faculty through mentored research and activities in and out of the classroom.

Now let's take a minute to answer a question that many of you might be wondering about, why did you get selected for this program?
Your entire UCI application was reviewed by the faculty in your school, along with every other application to UCI and we picked you! You should feel really good about that.

And we're really good at identifying who will be successful in honors in your major based on your high school record and UCI application.

You belong here. And even if you're not sure this sounds like you or sounds like you yet, I assure you that it is. This is a program that sees you, and takes care of you.

And we expect you and your honors classmates to take care of each other. And this is actually better than the Ivy League, because it's not extra or competitive.

It is real and it is collaborative. We can all do well together. But you've got to earn and own your status as a Campuswide Honors student by committing to doing the work and learning by doing,

giving yourself time and permission to try new things, take some risks, participating and contributing to the honors community, getting involved and bringing your talents and skills to the table, using your resources, which includes us the Campuswide Honors advising team as well as each other.

You'll see that honors is a challenge worth taking and that you will be able to continue your success and get the most out of your time at UCI.
The are over 1000 total students in Campuswide Honors, including over 250 freshm. Campuswide Honors has been around for 30 years we have 3000 happy graduates.

And all of our graduates started out in summer advising just like you wondering what they were doing here and what honors would mean for them.

And they would tell you that once you start participating in the honors community through taking classes, attending advising workshops, and getting involved, it will all come together for you.

You'll get a sense of what Campuswide Honors is, why you belong here, and how valuable can be for you when you really engage in it. So today is just a preview.

Let's begin module two of the presentation and move on to the specifics of what you need to do to complete Campuswide Honors.

Here's what you will need to do in order to complete Campuswide Honors also listed on your honors requirements handout.

You need to achieve an overall grade point average of 3.2 or above by graduation.

You need to enroll in a minimum of 12 units each quarter taken for a letter grade.
You need to complete your required honors core courses with a letter grade of C or better.

And you need to complete two quarters of faculty mentored research and develop it into an approved honors thesis paper or project.

Since you will be making your fall schedule and registering for classes at Summer Orientation, we will be spending most of our time in this presentation, talking about honors classes and curriculum. So that's the third item on this list.

Your Honors classes will be just part of your quarterly schedule but a really important part. And here is how the honors courses will play out for most of you,

All UC—I'm sorry—During your freshman year, you will take Honors Humanities Core and all UCI honors—

All UCI students take lower division writing

As a student in Campuswide Honors, you will fulfill this requirement by taking Honors Humanities Core and that is a really good thing because this class is unlike any other class you've ever taken,
Or probably ever will take. It integrates writing, literature, film, history, philosophy, popular culture, visual art, all around a unifying theme.

00:25:40.890 --> 00:25:51.270
This time being animal/culture. That's why we have our Romeo and Juliet bear. I don't think you're reading Romeo and Juliet. But this is just, he was too cute, not to include

00:25:52.620 --> 00:26:01.920
You'll basically be learning about how people across time and culture have interpreted their experiences and understood what it is to be human.

00:26:02.550 --> 00:26:15.360
So in terms of format Humanities Core a three quarter course sequence. It's worth eight units each quarter, and there are three quarters in each academic year: fall, winter, and spring.

00:26:16.560 --> 00:26:26.730
This class is made up of a lecture and a seminar, the lecture is where information is disseminated to the group, and this is a pretty large group usually, in lecture.

00:26:27.270 --> 00:26:37.020
And then there are small seminar sections, maybe around 19 people and that's where the real work of the course is done. So

00:26:47.940 --> 00:26:54.510
what's unique about Honors Humanities Core versus the other honors classes is that both honors and non-honors students can take this course.

00:26:54.930 --> 00:27:06.840
They have the same lectures, the same reading assignments, and the same number of writing assignments and exams.
But what makes this course special for you is that the Campuswide Honors students are in personalized honors seminar sections with other honors students and are taught by experienced faculty.

Not graduate student teaching assistants. So, this tends to create an exciting and dynamic learning environment.

General benefits of being enrolled in Humanities Core are being in a class with people who are not in the same majors as you so this leads to well rounded discussion and gives you some balance. Honors Humanities Core really lays the foundation for many of the courses you’ll be taking at UCI by teaching college writing and research.

Which are different than high school writing and research and our graduates, including many science and technology majors who come back and visit, consistently tell us this was one of the most useful classes they ever took.

Some Campuswide Honors students will also take honor science classes during their freshman year, and this will depend on your major and/or your academic plans.

You will receive information during group advising at Summer Orientation about whether or not you should enroll in an honor science class for fall quarter.

In general, most science majors and some engineering majors are expected to take honors science classes so Chemistry, Earth Systems Science, Biological Sciences, Pharmaceutical Sciences, Biomedical Engineering, Chemical Engineering, and Environmental Engineering majors. I am talking to you.
Nursing students and Public Health Sciences students an honor science class is not required for you this year.

If your major is listed on this slide please pay really close attention here. So Campuswide Honors has partnered with the schools of biological sciences and physical sciences to offer two honor science classes for honors freshmen this year: honors biology and honors chemistry.

In general these classes, both cover similar topics as the non-honors versions, but in greater depth and with a small class size. So instead of 400 students we're talking 100 students.

Which makes a huge difference because these classes are taught by top faculty, you're going to have motivated students to study with and greater attention from those faculty.

In some other non-honors classes, you may find that there's a competition for a limited number of A's, most students get C's and students who do the poorest will get F's in non-honors.

This is not the case in honors biology and honors chemistry, you will get the grade you earn, which is typically an A or B for 85% to 90% of the class.

You won't be alone as CHP students typically form study groups to help each other along and you should find less competition and more collaboration in honors biology and honors chemistry.
Honors biology and honors chemistry emphasize critical thinking and understanding the material, rather than memorization.

So this gives you a strong foundation in the topic, and you’ll learn how to study and manage your time. That all sound good? I hope so. Okay, so we're going to drill down to the format of these classes and also who takes what.

I like this slide is nice and simple. So UCI offers a lower division bio core that currently includes bio 93-99.

Declared Campuswide Honors bio majors will take honor sections of all of these core courses, when they are offered.

This is a class with a lecture and a discussion. You will enroll in honors biology this year fall and winter and each quarter next year fall, winter, and spring when offered.

Currently, only declared Campuswide Honors bio majors are eligible for the honors biology track. This is how we keep our class sizes small for you to have a more personalized experience through honors.

Campuswide Honors bio majors are required to enroll in these honors biology classes to meet part of your honors curriculum requirement. And that's a really good thing for all the benefits we just discussed.

That said, honors biology is not an option for you if you are not a declared bio major in Campuswide Honors so
For the rest of the science majors. We mentioned, you can see on the slide Chemistry, Earth System Science, Pharmaceutical Sciences, Biomedical Engineering, Chemical Engineering, and Environmental Engineering.

Now I’m talking to you. Honors general chemistry is a class for Campuswide Honors students in these majors who are already required to take three quarters of general chemistry plus labs for their major. So, you are required to enroll in honors general chemistry as part of your honors curriculum requirement.

The format for this class is that is a lecture and a lab. You will enroll in this class each quarter all of this year so fall, winter, and spring and then you’re done.

Honors chemistry and honors classes in general are not designed to be harder, but more in depth and engaging on par with the type of classes students take at elite liberal arts Ivy League colleges.

As with any college level chemistry or biology class, you will have to work for it as you do for anything worthwhile. But this is also very rewarding.

Finally, you do not need to have taken AP Chem, AP Calculus, or AP Bio in order to do well in these classes. Students, both with and without AP credit are able to be successful in these classes.

And you've met the prerequisites for these classes by being in Campuswide Honors.
Please let us know in the chat or contact us later this summer. If you have any questions about any of these freshman year honors classes.

Honors humanities core and depending on your major honors biology and/or honors chemistry are the Honors classes you will be registering for at Summer Orientation.

So let's get everyone's attention back to preview your remaining honors classes which you will take during sophomore and junior year and this is just so you can see what's coming down the road.

Water break – one sec.

Okay. During sophomore and junior year you'll build on the foundation of your first year honors classes and practice applying the skills that you've learned when you take one of two specially designed tracks of classes: either Honors Classic Track or Sustainable Societies. So students take only one of these tracks. Don't worry about this right now, you'll receive more information about

Both these awesome options of honors courses later on during this year during Campuswide Honors advising, we will help you pick the one that's right for you.

So we've included this information for you. Just as a very brief preview.
Obviously what you're probably concerned about is the more immediate future, the classes you will sign up for this summer.

Your Honors fall quarter classes will get you off to a solid start at UCI and prepare you for your other classes and activities, Campuswide Honors and otherwise, over the next four years. So that covers our third requirement the Honors classes.

Something else that is important to consider both in the long term and for today is what the Campuswide Honors classes count for

Please take a look at the handout in your packet called Requirements for a Bachelor's Degree at UCI. This may be the most important handout in your entire packet and, as my colleague Mary says, the most important hand out of your life so

That's up here on the slide. But as you may know, all UCI students have to meet general education or GE requirements.

And the good news is that the Campuswide Honors core classes fulfill many of your GE requirements. So it's possible to meet two or even three or four requirements with one class.

For Humanities Core in particular, you get a lot of bang for your buck. So if you take a look at the handout, you will see that the GE categories are listed on the left side of the page. So we've got
Category one-A writing lower division writing, Category two science, technology, Category three social and behavioral sciences and so on, on the right side of the page. You can see humanities core, honors chemistry, and biology listed next to the GE requirements that they fulfill so

00:36:09.510 -- 00:36:17.850

Humanities core is there under writing lower division writing, again under Category four arts and humanities.

00:36:18.300 -- 00:36:30.480

And if you keep on going down, you can see under Category seven multicultural studies and Category eight international and global issues, Humanities Core is there again. So, really, a lot of bang for your buck with that class.

00:36:32.130 -- 00:36:38.550

And then on the second page. You can also see how the sustainable societies classes count for the GE requirements.

00:36:39.150 -- 00:36:45.030

Both tracks classic and sustainable societies will help you satisfy GE requirements.

00:36:45.810 -- 00:36:53.280

Of course, the fact that the Honors classes meet the GE requirements is not the point of the classes, it's just a great perk.

00:36:53.760 -- 00:37:00.090

Any good honors program (and Campuswide Honors has been called the best honors program on the west coast

00:37:00.600 -- 00:37:16.410

#humblebrag) will require that students take a certain percentage of units in honors classes. Plus most Campuswide Honors students really appreciate the experience of the classes themselves as well as the fact that we've made it easier for you to fulfill GE.
There's also a note on this handout about AP credit and honors classes. One question we get a lot is whether AP or IB credit will exempt you from any the honors curriculum.

And they do not. High school AP classes are not equivalent to specially designed university level honors classes. So the UCI faculty have decided not to accept them as a replacement for honors classes.

However, this ends up not being a problem, especially since you may still get UCI credit and maybe even major credit, depending on the AP or IB exam and your score.

Plus AP and IB classes will absolutely prepare you to do well in your honors classes. And if you don't have a AP or IB credits that is totally fine because they are not a prerequisite to honors, you will still do well.

You can also see on this handout again on the right side that we've indicated when you should take your honors classes.

You will probably be taking one to two honors classes per quarter until you are finished, which leaves plenty of time to take classes for your major or some electives.

We aim for you to be finished with your Campuswide Honors courses by the end of your junior year so that you can really focus on research during your senior year. Speaking of honors research, the fourth and final thing you need to do to complete Campuswide Honors is research and thesis.
Most students do their research during their senior year, but some start earlier, and we encourage all those who wants to start to do so as soon as they feel ready.

Many of our alumni tell us that research was one of the highlights of their time at UCI.

This is your culminating experience. So it's where you get to show what you've learned, answer those burning questions you have, and discover new knowledge about a topic that interests you, with a faculty advisor of your choice.

Your research will culminate in an honors thesis paper or creative project.

The Campuswide Honors advising team will provide more information and guidance on this process. Later on when you are ready to start. So again, this is just the preview. So that's how you participate in, and ultimately complete Campuswide Honors.

Obviously we're going through a lot of information in a very short time, you can find a summary of what we've just reviewed in your packet the UCI honors overview.

Plus later on at Summer Orientation, you will receive major specific group advising to assist you in choosing, scheduling, and enrolling in your classes.
So now let's begin Module three of the presentation and put some of this to use from right now talking about your fall class schedule and registering for honors classes.

00:40:15.390 --> 00:40:32.430

We get a lot of questions about what a normal schedule for a Campuswide Honors student is and how to balance honors classes with a major requirements and although each student’s schedule may be a little different here is what is typical for fall. I’ll give you a moment to take a look at that.

00:40:37.980 --> 00:40:47.940

Okay, so you will most likely be taking three academic classes. The first of these is Honors Humanities Core, which is worth eight units and must be taken for a letter grade.

00:40:49.800 --> 00:41:02.850

Campuswide Honors classes must all be taken for a letter grade. And although Humanities Core is eight units, it's really one class. The eight units indicate you spend a little more time in class,

00:41:03.390 --> 00:41:11.340

meaning the seminar section meets twice a week instead of once and attendance is required, and you get a lot of GE credit

00:41:11.790 --> 00:41:22.260

And you're doing the same reading and taking the same test for lecture and discussion, so it's two for the price of one and just don't let the eight units fool you or your parents.

00:41:23.700 --> 00:41:34.020

The next class. Here is a major requirement or maybe something to explore different majors, and all of your major classes must be taken for a letter grade.

00:41:35.670 --> 00:41:43.410

This is anywhere from four to seven units. If you’re taking honors chemistry, then this classes seven units due to the lab component
Or it may be honors biology which is four units. Some of you in other majors may be looking at econ 20A (Intro to macro econ) or intro to psychology, physics, or math and so on.

Some of you may also need to take an additional four unit academic class or two to stay on track with your major.

And in addition to these three academic classes. Some students (Pharm Sci majors for example) may need to take a one to two unit course that introduces you to your learning community but is no work.

If this applies to you, you will receive more information about your one to two unit course during summer orientation group advising.

And then finally, because we're honor students, we need to schedule in our fun.

So pencil in some time to explore the campus and take advantage of all the things we have to offer. We've got the anteater recreation center or the arc.

That provides lots of interesting classes from dance to martial arts to sailing to cooking, you can really do a lot of different things there.

And we have over 600 student organizations. So really, there's got to be something here on campus that helps you explore your interests or try something new. So you're looking at a total of 12 to 21 units, your total number of units and classes will really depend on your major.
You can enroll in up to 18 units. When you enroll at Summer Orientation unless you are required by your major to take more units than that.

In which case they will work with you to enroll in the classes that you need. Otherwise it's 18 units max when you initially enroll and then you can enroll up to 20 units starting on September third.

Regardless of the number of units. Most of you will be taking three academic classes in the fall, which is just the right amount for your first quarter in honors at UCI. So that's the takeaway here – just three classes.

This is a manageable fall quarter schedule for you as a Campuswide Honors student and just remember there are 30 years of students who've taken and succeeded in this exact same schedule.

You will need to put in the work. And you'll get off to a solid start both on honors classes and your major or your major exploration if you're still deciding on a major.

That said, it's really going to be up to you to find the balance between schoolwork, and time for yourself.

So considering the normal schedule for honor students and the hours you'll need to dedicate to your academic success,

You will need to find wear in your schedule you can make time for self care. So just taking a shower or eating breakfast or maybe going for a walk. So
please talk to us later if you have any questions about this schedule or finding a balance. Your Honors Peer Mentor may also have some good information and perspective for you on that freshman honors schedule.

So now, please open your packet to the printout from the online schedule of classes. This is the honors humanities core course schedule. And if you're looking at the schedule of classes online honors humanities core options are toward the end of the list.

Humanities core is a two part class: there's a lecture and a seminar and you will need to enroll in both parts when you enroll.

So there are three lecture sections each week, and they are all the same. Everyone enrolls in H1A lecture, each of which corresponds to an honors Humanities seminar section. So when you enroll in the seminar, be sure to enroll in H1AS, not 1AS. Remember H for honors 1AS for seminar.

I want you to make note of how these lectures and seminars are linked together. So each lecture is listed above the seminars that are linked to it.

And if you can see my pointer here, the section letter is B for this lecture. And then underneath that you can see the section letters.

Sorry – for the seminars are also B. So you need to enroll in lecture first and then enroll in one of the seminars that is linked with it. Please also note that these seminars have a limited size. So these are limited at 17 students here.
And

00:46:29.430 -- 00:46:35.880
that means that they can fill. So it's important to have some backup options, just in case the seminar you want is not available.

00:46:37.380 -- 00:46:53.280
I should also note that the printout that we've given you or the the schedule that we've given you became obsolete the moment that we took a screenshot of it. So definitely take a look at the online schedule classes for the most up to date information.

00:46:54.300 -- 00:47:04.200
And just as a note the humanities course seminars are kept small based on UCI policy about the size of writing classes. And this is really to your benefit.

00:47:04.650 -- 00:47:12.240
But it will be hard to change your Humanities Core seminar section after you enroll. So please pay close attention to what you are enrolling in

00:47:13.950 -- 00:47:20.130
If you encounter any scheduling problems during the summer, please notify us immediately as we may be able to help

00:47:22.950 -- 00:47:25.770
There's no page in the packet for these next two classes.

00:47:26.250 -- 00:47:35.070
But they work similarly to honors humanities core and that you will be registering for multiple parts of the course. So for honors chemistry, there are four parts.
Students who need to take this class need to register for all four parts: lecture, discussion, lab, and lab lecture. Chem labs are also very small for safety purposes. So you'll also need to be flexible and have a backup with them.

Bio majors, you will be automatically registered for bio H93 lecture and discussion by your school.

Work with the advisors during group advising at Summer Orientation if you have questions or concerns about this class.

So this is an example of what you'll be doing when you register for your fall classes.

So deciding what classes you want to take and when, and coordinating days and times of lectures and discussions, and updated information is online and you'll enroll online, and it's all big beautiful puzzle and I hope it all works out really well for you.

So let's wrap up the enrollment portion of our presentation with a few general notes about registration, as well as a few things to do and be aware of this summer.

As you may already know Campuswide Honors students get priority enrollment, meaning that you get to enroll in classes each quarter before almost every other undergraduate student.

But classes are not guaranteed. So whenever you enroll, we strongly recommend always having a backup plan.
So alternate classes or class times as you are not guaranteed to get your first choice of every class or section.

But don't worry, there will always be classes for you. They just may not be your preferred classes or at your preferred times.

Your priority enrollment will begin when you register for your winter quarter classes in November before almost every other undergraduate student.

So in order to enroll in any class at UCI students need to meet the prerequisites. The prerequisite to enroll in Campuswide Honors classes is completion of the UC entry level writing requirement.

In addition, fees must be paid every quarter - the super downer part of this presentation.

For fall quarter,

fees must be paid by four o'clock pm on September 16 and this is not a postmark deadline. If you miss this deadline,

all of your classes will be dropped and there's not a guarantee you'll be able to get them back. Plus, to add insult to injury, you will have to pay late fees, which is not fun.
And you'll need to pay fees again for winter quarter and for spring quarter and every quarter until you graduate.

00:50:11.010 --> 00:50:28.830
So we recommend taking care of this well ahead of the deadline if possible, and being proactive about checking your bill and taking initiative to follow up with student account services, billing, financial aid and so on if you have questions about your bill or how fees are paid.

00:50:30.720 --> 00:50:41.310
You will soon get an email from us about the Campuswide Honors summer reading. Many honors programs including ours do a common reading to start to build an honors community.

00:50:41.850 --> 00:50:49.920
This is usually a short fun article, video, or podcast. This summer, we're thinking of maybe a little reflection activity so

00:50:50.280 --> 00:50:59.550
nothing too strenuous – just something fun that when you come to Campuswide Honors new student convocation and orientation in the fall, we can talk about it with you.

00:51:00.150 --> 00:51:05.730
This is really one of our favorite parts of fall orientation and we’re really looking forward to talking with you about it.

00:51:07.650 --> 00:51:17.370
Please watch your mailbox in early September for a special letter from Campuswide Honors about some Welcome Week activities for honors students, including those listed here.

00:51:17.700 --> 00:51:31.980
You heard me right. I said mailbox – snail mail – so make sure to go check the mail. And when we meet again during welcome weekend throughout the next year we will review some key points and provide you with additional information.
Plus at weekday SPOPs from three o'clock to four o'clock PM, you can come to the honors office located in 1200 Students Services 2 to get a free gift.

and meet the Campuswide Honors advising team as well, some current honor students. This is really a great opportunity to get to know your honors advisors and to ask questions about Campuswide Honors or your fall quarter schedule. Again our open office hours are from 3 to 4pm on both days of SPOP as long as they fall on a weekday.

The location and time are also listed on the Campuswide Honors freshman summer 2019 advising packet that you received with your email. You can come on one or both days, and on day two you can even bring your parents. We are excited to meet you.

Now we have some time to answer some questions you might have. After hearing all about Campuswide Honors. Is there anything pressing? Okay.

Any questions for the group before we move forward?

Okay, well I'm so glad that I was able to answer lots of your Campuswide Honors questions already, chances are other questions you still have will be answered during group advising at Summer Orientation.
If you or your parents have questions after SPOP, please feel free to contact us anytime this summer with those questions.

Your Honors Peer Mentors are also available to answer your questions. But the honors advising team is the best source of information about honors classes.

and advising, so we're available, Monday through Friday 9am to noon and one to 4pm. And that concludes the summer advising presentation. We hope that you have a great summer and we look forward to meeting you in person in the fall.
